Objective

Recent graduate skilled in PHP development with a successful freelancing background. Eager to contribute innovative solutions and thrive on continuous self-improvement. Seeking a challenging role in a dynamic team to leverage my skills and enthusiasm for impactful contributions. Known for my problem-solving abilities, I actively pursue new skills and exhibit strong leadership qualities.

Personal Project

Mediahub 2023

- Social Media app focuses on news specific to Arab and their news and with some features that concern us.
- Provide support for multiple languages, allowing users to browse and access app information in their preferred language.

Chat App 2023

- Implement a secure user authentication system to protect user accounts and ensure privacy.
- Enable real-time messaging with features like read receipts, typing indicators, and multimedia file sharing (photos, audio)
- Support group chat functionality with the ability to add or remove participants, assign administrators, and customize group settings.
- Include voice and video calling features for users who want to communicate in real-time.

Educational platform 2023

- Teachers can upload various educational content, including videos and exams. Interactive features allow real-time conversations between teachers and students.
- Instructors can evaluate a course's popularity, track the number of subscribers, and set course prices. Seamless integration with secure payment gateways makes course purchases easy.
- Customizable courses meet different learning needs and preferences. Social interaction features, such as comments and forums, increase engagement within the platform.

Electronic library site 2022

- User-friendly interface for easy navigation. Advanced search functionality with filtering and sorting options. Responsive design for seamless access across different devices.
- Detailed information about the book, including title, author, genre, and summary. Secure user authentication and profiles to track reading history. Download options with secure download function.
- Admin dashboard and content management system (CMS) for easy content management. User rating system and book reviews for community engagement. Integration with social media platforms and support for multiple languages.

Space educational application (graduation project) 2022

- Integrating three-dimensional shapes to provide a distinctive educational experience in the field of space education.
- Implementing an artificial intelligence system that handles user questions and provides comprehensive and informative answers.
- Add a section in the application that displays the area directly with detailed educational information.
- Enable advanced interaction with the 3D space environment to enhance the learning experience.

Experience

MSP technical instructor (PHP)

2022-2023

- Demonstrated proficiency in delivering high-quality technical instruction.
- Facilitated engaging training sessions, translating complex technical concepts into understandable content for diverse audiences.

Hackathon Nasa space

2022

- Spearheaded the creation of an innovative solution during the NASA space-themed hackathon, addressing a specific challenge.
- Worked within a dynamic team environment, collaborating with individuals possessing diverse skills to set creative solutions.

PSED

2022

- Led a cross-functional team to develop an innovative solution that addressed a specific challenge presented at the hackathon.
- Identified key challenges early on, strategically planned the development process, and executed the plan efficiently to meet project goals.

Techne summit

2023

- Team leader in the Techne Summit competition, which was a competition for startup companies
- We participated in the graduation project, where we were studying in our company about changing the approach to studying in Egypt through smart applications in learning.

Team leader in graduation project

2023

- Fostered a collaborative and innovative team environment, encouraging each member to contribute their unique skills and ideas, resulting in a well-rounded and successful project outcome.
- Demonstrated flexibility and adaptability to changing project requirements, adjusting team strategies as needed to overcome challenges and meet project objectives.
